

Introducing New Built In Series

HOME APPLIANCES

Nationwide Gas Shortage:

The country is facing a widespread gas crisis characterized by shortages in supply and escalating costs, prompting significant challenges for consumers and industries reliant on gas as an energy source.

Consequently, there is a growing need for alternative cooking solutions, with electric cooking emerging as a prominent choice amidst the gas scarcity.

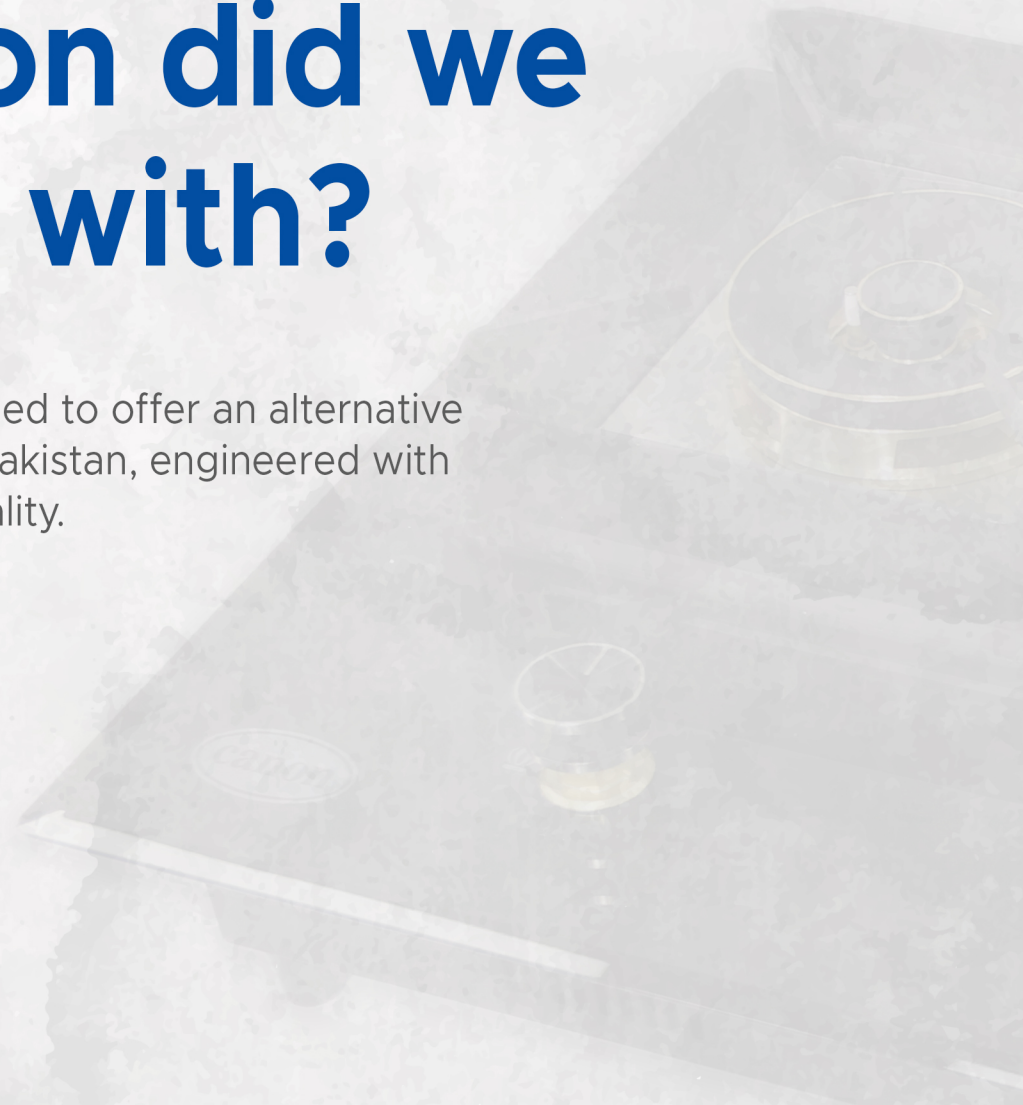

HOME APPLIANCES

What solution did we come up with?

A top-tier, premium appliance designed to offer an alternative cooking solution for households in Pakistan, engineered with exceptional quality.

Key Benefits

Flexibility

The flexibility to choose the ideal cooking method for every dish, whether it's the precision of induction cooking, the intense heat of infrared technology, or the traditional control of a gas flame.

Convenience

With its unique combination of induction, infrared, and gas burners, this appliance offers unmatched efficiency and convenience in your culinary adventures.

Creativity

Explore new recipes, sauces, and flavors effortlessly, free from any hassle or limitations.

Safety features

Prioritize safety with built-in mechanisms to prevent accidents or mishaps, providing peace of mind for users.
